

## EMPLOYMENT

---

<b>General IT, Intern</b>	<b>The Warehouse Group</b>	<b>March 2017 – July 2017</b>
---------------------------	----------------------------	-------------------------------

- Due to the nature of the internship, I worked with a number of different areas of the organization's IT team.
- Spent time working closely with the organization's infrastructure team, and was responsible for documenting network infrastructure for two of their international offices.
- Briefly worked with the development team in setting up a number of the organization's iPhone based scanners.

<b>House Cleaner</b>	<b>Self-Employed</b>	<b>July 2012 – August 2015</b>
----------------------	----------------------	--------------------------------

- Managed and maintained a small cleaning operation in which I would clean clients houses and take care of their pets on a weekly basis.
- Maintained the operation for three years before I decided to focus solely on my study.

## EDUCATION

---

<b>Albany, Auckland</b>	<b>Massey University</b>	<b>January 2015 – December 2017</b>
-------------------------	--------------------------	-------------------------------------

- Bachelor of Information Sciences, Exp Graduation: December 2017
- Majoring in Information Technology
- Minorng in Small Business Management and Entrepreneurship
- Notable topics covered in study: Front-end web development, SCRUM fundamentals, Software development methodologies, C#, Software Architecture, Network fundamentals, UML Modelling.

## TECHNICAL EXPERIENCE

---

### Projects

- **Portfolio Website:** (2017). A SPA website which will act as a centralized hub to present my projects and log my activities as I progress as a developer. Created using HTML/CSS (Bootstrap), JavaScript (VueJS).
- **ToDoList:** (2017). Simple ToDo List application, allows users to add, cross off and delete tasks. Created using HTML/CSS (Bootstrap), JavaScript & JQuery.
- **CurrencyConverter:** (2017). A bare-bones currency conversion website which pulls real-time exchange rate information from the Central European Bank (via the Fixer.io API). Created using HTML/CSS (Bootstrap), JavaScript & JQuery.
- **QuoteGenerator:** (2017). Website which gives users random quotes (based off of a stored list). Users can also contribute their own quotes which will be added to the persistent list of quotes. Created as a duo project using HTML/CSS, JavaScript & PHP.

## PERSONAL INTERESTS AND EXTRA-CIRCULAR ACTIVITIES

---

- **First Team Hockey Goalkeeper (2009 – 2015)** Played within two successful school hockey teams as an actively contributing and well-spoken team member.
- **Diverse Interests:** I have a number of interests outside of programming, these include but are not limited to: Going to the gym, photography, traveling, mixed martial arts, and watching sports.

## Languages and Technologies

---
